Prestart checklist

- ✓ A strong internet connection Ideally, you will need to be on Wi-fi or have good 4G signal.
- ✓ An eSIM compatible device If you are unsure, see list of compatible devices <u>here</u>
- $\checkmark~$ Your device must not be locked to a single network.
- In this guide, we assume your main SIM is installed in Slot 1 and your new eSIM is installed in Slot 2.
- If you have a Google Pixel, an extra step is required to enable 2 SIMs. Click <u>here</u>.
- If you have a Samsung phone or tablet, click <u>here</u> for our dedicated Samsung page.

PART 1: Install your eSIM using QR code (continued)

Notes

• When installation is complete, you will notice 2 signal strengths at the top of your screen!

PART 2: Activate your data bundle

Tips

- Notice the two signal strengths at the top of your screen!
- The signal strength shown on the right is the one being used for "Mobile Data".
- To save battery, turn off your easySim if you're not using it.
- We suggest you name your eSIM "easy" so you can easily recognise it. To do this, click the edit pencil in top right corner of screen.

Wishing you safe travels, from all at **easySim**.global
